

Job-order manufacture

Aeroteam manufactures complete cockpits, individual instrument panels, and other cockpit accessories to order. So as to be able to perform such an order, we would need the following information from you:

- The shape of the instrument panel in the required size (Dimension A);
- Fuselage inside width in the place of the seat (Dimension B);
- Cockpit inside length as measured from the instrument panel to the extreme rear point of the seat back (Dimension C);
- Fuselage inside height as measured from the floor to the extreme top point of the canopy (Dimension D) and the inside height from the floor to the extreme point of the canopy frame (Dimension E).

Any background documents available to you (i.e. photos, drawings, etc.) would be of a great help for us.

In the case of this job-order manufacture it is to be allowed for that the time period necessary for the preparation and manufacture could vary between 4 and 6 weeks, in relation to the scope and complexity of the work. We will provide you with a detail price quotation and expected lead time within 7 days as of the receipt of the background documents.
